

AaronExodus Performance Brief

My name is Dannel Albert and I am a software engineer. I founded AaronExodus, LLC in January of 2004 and have been involved in numerous projects of all sizes, and have successfully designed and created software solutions for a broad range of industries.

My focus is not simply on competency, but achieving excellence to accelerate the profitability and productivity of businesses and individuals alike. I provide practical and technical solutions that are proven to work. Whether you have a specific challenge or an idea you would like to implement, I will help you realize your goals.

Thank you for considering me as your consultant. I look forward to hearing from you soon.

Sincerely,

Dannel Albert

Testimonials

"Ok...this guy.....did what I thought was nearly impossible for the amount I paid him. Not only did he do EVERYTHING I asked...he threw in extra features and capabilities in the PHP script that I didn't ask for...but desperately needed. His communication skills...are top notch. I was able to speak to him whenever I wanted or email him and get an almost immediate response. A++++"

Shannon R.

"I can thoroughly recommend this programmer without hesitation; he attended to all aspects of this project with speed and efficiency, delivering an excellent final result. Many thanks again."

Bob Z.

"Dannel did a great job. He was able to complete the project fast and with no problems. Highly recommend to everyone!!!! Thanks for the great work!!"

Brian B.

"Excellent coder, went above and beyond, script works very well."

Bill S.

"Very professional, very quick."

Steve T.

"Excellent, fast, did great, understood very well the requirements (that were not so simple). Excellent communication skills .I am a very happy customer :)"

Portfolio

USSMC

<http://www.ussmc.com>

Professionalism, productivity and partnership at its best. Digital Generation Consulting provides phenomenal web design and AaronExodus supports the back-end systems that drive the site.

Small Business Administration Training Workshop Registration Sites

Small business owners quickly and easily register for SBA workshop trainings, while a simple, easy-to-use platform for the SBA to manage its training classes.

USDA Online Training Site

With a short timeline and logistical and technical challenges, we delivered a fully functional training management system supporting hundreds of users.

EEO Tracking System

A powerful, simple, all-in-one solution for tracking and managing EEO complaints.

MCSE Training Workshop Registration

This registration system supports USSMC in providing MCSE training, simplifying the registration process.

NOAA Document Tracking System

This system streamlines business processes for tracking and reviewing documents for the National Oceanic & Atmospheric Administration.

Cinema Hill Motion Picture Company

<http://www.cinemahill.com>

Movie maker Shannon Rawls can now focus on movies and spend less time fussing over his website. In the past, cast and crew information was entered by hand. Now, cast and crew on movies add and update their roles themselves and changes are simply reviewed to prevent spam and unauthorized changes.

Online Custom Sign

<http://www.onlinecustomsign.com/design/>

Developing a flash movie is one thing, but developing a fully functional application in flash is not for the faint-hearted – and that is exactly what was created at onlinecustomsign.com. Clients can place orders for pre-made signs or create their own within this unique, easy-to-use online application.

DV Festival

<http://www.digitalvideofestival.com>

Managing a film festival from beginning to end has never been so simple! Movie makers register on the site to be entered in the festival and mail in their movie with a tracking number the site provides. When entries are received the finalists are matched on the web site by an administrator and schedules are created and displayed. At the end of the festival, winners are displayed and each year of festival information is automatically archived.

Check Rankings

<http://www.checkrankings.com>

From concept to reality, the vision of tracking a site's movement through the search engines has been realized from the ground up.

Jersey City First Wesleyan Church

<http://www.jcfwc.org>

Community and fellowship have been extended beyond their church doors to the Internet. Their web site keeps members in touch with each other and expands the world that they reach. Custom web site design and a content management system give them a web site they can update on their own, with the peace of mind that technical support is only a phone call or an e-mail away.

African-American Real Estate Professionals of D.C.

<http://www.aarepdc.org>

Thanks to the wonderful web design of Digital Generation Consulting and the ingenuity of AaronExodus, AAREPDC has a brand new web site that works to gel their organization's online presence.

Kelli Maroney Website

<http://www.kellimaroney.com>

Kelli's website is a fun, dynamic website that displays her talents wonderfully. It has something for everything including information and merchandise for fans and demo reels for those looking to cast her in their project.

CoWriter Connection

<http://www.cowriterconnection.com>

CoWriter Connection was presented as an idea to bring a community of writers together to collaborate and is now a growing website that accomplishes just that. It is supported by its membership and administration of CoWriter Connection is almost completely automated.

TS&P Auction Properties

<http://www.tspauctions.com>

Taking an idea and creating custom website and software solutions is what AaronExodus thrives on. TS&P came to us with a vision and a few web sites that had elements of what was needed, and with the help of Digital Generation Consulting, we made it happen. TS&P now concentrates on putting together auctions and not on managing listings, which is now a highly automated process.

MyHandicapper Sports Handicapping Monitor

<http://www.myhandicapper.com>

Whenever you depend upon information that you don't have control over, managing change becomes a top priority. MyHandicapper was built with change in mind and designed to be extensible and flexible enough to deal with changes in the external data fed into the site.

Angel Art Portraits

<http://www.angelartportraits.com>

Judy Kemp was an artist without an online home ... until now! Now, she has an online gallery where people can experience her works of art and purchase custom or pre-made portraits.

My SEO Tool

My SEO Tool is a custom desktop application to help a website owner rise to the top. It incorporates several tasks that have been automated to increase productivity and search engine placement.

RSS Feed Generator

(private website)

This site was developed to generate RSS feeds on any topic using search engine results, for use by invited users only.

BmoreNites

<http://www.bmorenites.com>

A social website promoting night life in the Baltimore, MD area, designed by Digital Generation Consulting in conjunction with AaronExodus, providing back-end support.

Connect Texoma

<http://www.connecttexoma.com>

A potential disaster was averted when the Connect Texoma website crashed and AaronExodus came to the rescue. Not only was the site restored with minimum downtime, but the efficiency of the site's search engine was improved in the process.
